AWS Certified DevOps Engineer

Professional — Amazon Web Services

Certified Kubernetes Administrator

CKA — CNCF

EDUCATION

B.Tech — Computer Science & Engineering

Jawaharlal Nehru Technological University (JNTU),

Hyderabad, India

2010

PROFESSIONAL SUMMARY

Senior DevOps Engineer with **7+ years** of experience delivering highly available, secure, and automated cloud platforms across insurance, financial services, and enterprise technology. Deep hands-on expertise in **AWS, Azure, Kubernetes (EKS/AKS), Terraform, Ansible, and GitOps-driven CI/CD**. Proven track record in DevSecOps, SRE practices, observability, and AI-assisted automation — driving measurable improvements in deployment velocity, system resilience, and cloud cost optimisation across large-scale regulated environments.

Markham, Ontario

Jenkins

GitHub Actions

Argo CD

AKS

Terraform

Prometheus

Grafana

Dynatrace

HashiCorp Vault

Aqua Security

ARC Runners

GitHub Copilot

Architected end-to-end **GitOps pipelines** using Jenkins, GitHub Actions, and Argo CD, standardizing declarative delivery across microservices and reducing release lead time across all environments.

Configured **GitHub ARC self-hosted runners** (actions-runner-controller) with registry proxy and monitoring, enabling secure, scalable, and observable CI execution within the enterprise perimeter.

Designed and provisioned production-grade **AKS infrastructure using Terraform and Ansible**, implementing high availability, automated drift detection, and regulatory compliance guardrails.

Established centralized observability with **Prometheus, Grafana, and Dynatrace APM** — enabling distributed tracing and reducing MTTD across cloud infrastructure.

Embedded **DevSecOps practices** across the SDLC: HashiCorp Vault secrets management, Aqua Security container scanning, IAM hardening, and AWS KMS encryption.

Led **24x7 production support** with self-healing automation, structured runbooks, and incident workflows — maintaining platform SLA adherence.

Senior Infrastructure Developer

Mar 2021 – Jul 2024

Cognizant Technology Solutions

3 yrs 5 mos

Jenkins

EKS

AKS

Terraform

Ansible

Splunk

Dynatrace

SonarQube

IBM UrbanCode

Spearheaded **enterprise CI/CD transformation across 15+ Agile teams**, standardizing pipelines with Jenkins, SonarQube, Docker, and IBM UrbanCode Deploy.

Designed and hardened **Kubernetes platforms (EKS and AKS)** enforcing RBAC, network policies, and security baselines across multi-tenant environments.

Built **reusable Terraform and Ansible IaC modules** reducing environment provisioning from days to hours across multiple AWS and Azure regions.

Engineered **Splunk and Dynatrace dashboards** aggregating metrics and traces — sustaining **99%+ platform availability** across enterprise Kubernetes workloads.

Delivered **Database-as-Code pipelines** for Oracle and PostgreSQL, eliminating manual DBA intervention through automated schema versioning and deployment promotion.

DevOps Engineer

Jan 2020 – Jul 2020

Accenture Solutions

7 mos

Azure DevOps

Terraform

ARM Templates

Nagios

Grafana

Kibana

Designed **Azure-based CI/CD pipelines** using Azure DevOps, Terraform, and ARM Templates — enabling multi-environment deployments with full audit traceability.

Introduced **GitOps workflows** with branch strategy, PR-gated deployments, and environment promotion controls — improving governance across development teams.

Built monitoring using **Nagios, Grafana, and ELK Stack**, reducing unplanned service disruptions through proactive alerting.

Site Reliability Engineer

Nov 2017 – Dec 2019

Accenture Solutions

2 yrs 2 mos

Jenkins

Kubernetes

Git

Prometheus

Nagios

Bash

Engineered **automated CI/CD pipelines using Jenkins**, increasing deployment frequency and reducing manual release intervention across multiple application teams.

Led **cross-team SVN-to-Git migration**, modernizing version control and establishing branching strategies adopted organization-wide.

- Administered **Kubernetes environments** with rolling updates and zero-downtime deployments — delivering 24×7 production support and consistently meeting aggressive MTTR targets.
